

August 22, 2023

Dear Neighbor of Malden Park,

Bridging North America (BNA) is the private-sector constructor for the Gordie Howe International Bridge project. A key project feature is the inclusion of a Community Benefits Plan which includes a commitment to build a Gordie Howe International Bridge observation area in Malden Park. To fulfill this commitment, BNA will begin construction of the observation area in August 2023. This includes creation of an elevated viewing area with railings and benches, in addition to the installation of wayfinding signage within the park. The completed observation area will provide an attractive and safe place for residents, students and tourists to observe the construction and operation of the Gordie Howe International Bridge project. The observation area will remain a feature in Malden Park after bridge project construction has concluded.

The Gordie Howe International Bridge team has been working closely with the City of Windsor to ensure the observation area will be constructed safely, responsibly, and in accordance with all appropriate environmental guidelines and permits while minimizing impacts to the park, its users and nearby residents.

It is anticipated that construction will begin late-August, 2023 and be completed by September 2023. During this time, access and enjoyment of the park will continue although access to the observation area construction site will be limited. We request that you please take notice and adhere to any signage and fencing that is erected during construction and remain a safe distance from the observation area work while it is occurring.
