

GORDIE HOWE INTERNATIONAL BRIDGE

Construction Activities: United States

Week of November 18, 2019

Dates and times provided below may change due to weather conditions and other factors affecting construction activities. Although this list is intended to be comprehensive, unavoidable emergency road detours and road closures may occur. Please watch for workers along this corridor. We apologize for any inconvenience and thank you for your patience.

Construction Activities - What you need to know

US POE

- Started the backfill of the drainage layer and installation of Wickdrains. Continue with excavation, clearing and grubbing and deliveries of imported materials; sand and drainage layer. DTE continues with removal of cables and cutting poles along South St. Miscellaneous demolition is on-going.

US BRIDGE

- BNA and their subcontractors recently completed the first stretch of fourteen 2m drilled shafts for the US Seawall modifications. The next phase is to construct new anchor wall elements and transfer the load from the existing anchor wall to the new 2m shafts. This work allows the removal of existing seawall interferences that facilitates installation of the twelve 3m tower foundation drilled shafts to begin.
