

PONT INTERNATIONAL
**GORDIE
HOWE**
INTERNATIONAL BRIDGE

Good afternoon,

Here are a few things we wanted you to know about.

Upcoming Long-Term Closures of Three I-75 Road Bridges

As construction of the Michigan Interchange begins, Bridging North America will institute long-term closures on three I-75 road bridges: Springwells Street, Livernois Avenue and Clark Street starting on **October 21, 2019**.

The three road bridges are being closed in preparation for upcoming demolition and reconstruction beginning this fall. The demolition of the three bridges will take place over a weekend. Once final dates are set for the weekend-long demolition work, Bridging North America will publicize the information.

Vehicles can continue to exit and enter I-75 in both directions at the Springwells Street, Livernois Avenue and Clark Street off-ramps and on-ramps. West Fisher Service Drives between Springwells Street and Clark Street, on both sides of the Interstate, will remain open from October 21 through the weekend selected for bridge demolitions.

Several nearby I-75 road bridges will remain open for the duration of the closures: Green Street, Waterman Street, Dragoon Street, Junction Avenue and West Grand Boulevard.

Questions about this work can be directed to 1-844-322-1773 or info@wdbridge.com.

Jefferson Barrier Wall Design - Cast Your Vote Before October 30, 2019

As part of the Gordie Howe International Bridge project, an 85-100' wide landscaped perimeter is part the US Port of Entry (POE) site design. This green space will provide public benefit with native pollinator-positive plantings, and a public multi-use path that will connect Campbell and Green Streets by running along the US POE Wall parallel to Jefferson Avenue. The Jefferson Wall is an opaque, 8' high, non-climbable security wall that will have an aesthetic treatment on the public side facing Jefferson Avenue. The aesthetic treatment will reflect design cues, colors, and materials from nearby historic Fort Wayne.

Three wall design alternatives have been presented by Bridging North America and are open for input from the US community until October 30, 2019. Learn more about the three alternatives and cast your vote [here](#) on which option you would like to see installed.

Wick Drain Installation

Crews are well into wick drain installation at the Canadian Port of Entry with approximately 22,000 out of 150,000 complete. What's a wick drain? Watch this video to find out.

Have a great weekend,

Gordie Howe International Bridge Team
